PROCESS FOR PRODUCING THE SAME : **Mail Stop: Petition**

PETITION TO WITHDRAW HOLDING OF ABANDONMENT

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

THE COMMISSIONER IS AUTHORIZED
TO CHARGE ANY DEFICIENCY IN THE
FEE FOR THIS PAPER TO DEPOSIT
ACCOUNT NO. 23-0975.

Sir:

In a NOTICE OF ABANDONMENT mailed August 4, 2009 and received on August 6, 2009, Applicants' attorney was advised that a response to an Office Action mailed October 29, 2008 has not been received.

The undersigned, an attorney in the firm of Wenderoth, Lind & Ponack, L.L.P., and the attorney in charge of prosecuting this application, has searched the docket records of his office, as well as the file jacket, and has concluded that the Office Action of October 29, 2008 was never received.

In this regard, when an Official Action is received, it is first docketed for action by Pamela Veazey, the chief docket clerk of the firm, in a computerized database which is maintained by her for this purpose.

A copy of the relevant pages, i.e., a printout of Ms. Veazey's computerized docket for December 1, 2009 (a Monday, which was the effective due date for response), is submitted herewith as **Exhibit "A"**.

As can be seen, there is no reference to the subject application on this printout, in particular docket pages 18-21.

Likewise, the undersigned maintains a personal docket, and copies of the pages for the months of November and December 2008 are enclosed as **Exhibit "B"**. Upon receiving an Office Action, the serial number and the name of the first inventor are entered on the due date. Again, as can be seen from the enclosed copies, no reference to this application was entered on the due date of November 29, 2008 (or November 30, 2008 or December 1, 2008).

In addition, the undersigned's secretary, Patricia Hill, maintains a docket book in much the same way that the undersigned does, copies of the page from Ms. Hill's secretarial docket for November 29, 2008, November 30, 2008 and December 1, 2008 being enclosed as **Exhibit "C"**. Again, no reference is made to the subject application.

A search of the WL&P file jacket also indicates that the Office Action was not received since reference to outstanding Official Actions would normally be entered on the face of the file by the chief docket clerk. A copy of the relevant portion of the face of the file is enclosed as **Exhibit "D"**.

As noted above, the undersigned's docket, the undersigned's secretary's docket, and the computerized docketing system are maintained separately. When correspondence (e.g., an Office Action) from the U.S. Patent and Trademark Office (PTO) is received by Wenderoth, Lind & Ponack (WL&P), it is matched to the corresponding WL&P file and the receipt of the correspondence is recorded on the face of the WL&P file (**Exhibit "D"**). The correspondence is then reviewed and the type of correspondence and the initial due date for responding to the correspondence, as well as any possible extensions, are entered into the computerized docketing system (by Pamela Veazey or one of the two individuals she supervises). The computerized docketing system cross-references each patent application by WL&P matter number, PTO serial number, title, client name, and last name of the first inventor. Once the type of correspondence and associated due date have been entered into the computerized docketing system, the correspondence and corresponding WL&P file are brought to the appropriate attorney/agent.

The undersigned, as well as the undersigned's secretary, then both separately review the correspondence. The undersigned handwrites the PTO serial number, the last name of the first inventor, and the type of correspondence in the appropriate space in his docket for the date that the response to the correspondence is initially due (**Exhibit "B"**). The undersigned's secretary similarly handwrites the PTO serial number, the last name of the first inventor, and the type of correspondence in her docket book on the appropriate page for the date that the response to the correspondence is initially due (**Exhibit "C"**). It is in this way that the receipt of the correspondence and associated due dates for responding to the correspondence are entered into the triple redundancy docketing system.

Further, a daily report is printed out from the computerized docketing system that lists all PTO applications that have responses to communications due on that date (**Exhibit "A"**). The daily report also indicates what, if any, extensions are available for responding to the communication. The daily report is manually handed out to each attorney/agent and secretary team for review. Each item on the report is indicated as either to be filed on that day or extended, if available, and the report is returned so that this information can be used to update the status in the computerized docketing system. Further, the undersigned and the undersigned's secretary check their dockets daily to determine what communications need to be responded to on that day, as well as in the near future, and regularly compare dockets to insure that the two dockets are consistent with each other. In addition to indicating such on the daily report that is reviewed and used to update the computerized docketing system, if a response to a communication is being extended, both the undersigned and the undersigned's secretary write the PTO serial number, the last name of the first inventor, and the type of correspondence on the next due date for responding to the communication, along with a notation indicating the extension of time, in their respective dockets. It is in this way that the triple redundancy docketing system is maintained.

In light of the above discussion, it is submitted that sufficient evidence has been provided to support a finding that the docketing system is sufficiently reliable and that the Office Action of October 29, 2008 was never received. As a result, it is respectfully requested that the Petition be

granted, the application be restored to active status by withdrawing the holding of abandonment, the Office Action be remailed, and a new due date be set.

The Commissioner is authorized to charge any deficiency or to credit any overpayment associated with this communication to Deposit Account No. 23-0975, with the EXCEPTION of deficiencies in fees for multiple dependent claims in new applications.

Respectfully submitted,

Takashi SATO et al.
